

Migration Study on Fall Term 2000 Cohort

This is a migration study on the cohort of first time, full time (credit hours greater than or equal to 12), and degree seeking undergraduate students enrolled in the Fall Term of 2000. The study provides detailed information on enrollment, graduation, retention, attrition and migration of the cohort class over a 1-year to 6-year time span. With this study, each college can track the migration patterns of their students and determine the graduation, retention, and attrition rates of students in their college cohort from 2000-2006.

There were 2,738 students in the Fall Term 2000 cohort class, enrolled in 10 colleges/programs at the university. Table 1 contains the student graduation, retention, and attrition numbers and percentages for 2004 (4-year), 2005 (5-year) and 2006 (6-year). The data showed that in Fall Term 2006, there were 119 students from the cohort continuing their study in the university. The attrition rate decreased in Fall Term 2006, which indicated that the number of returning students was more than the number of attritions in that years. Figures 1, 2, and 3 depicted the graduation rate, retention rate, and attrition rate by year for the Fall Term 2000 cohort class. The six year graduation rate for Fall Term 2000 cohort was 60%. The first year retention rate for the Fall Term 2000 cohort was 79.5%. One year later, 29.5% of the students in the cohort had left OSU.

Table 1: Fall Term 2000 Cohort Graduation, Retention, and Attrition Rates

Fall 2000 Cohort	2004		2005		2006	
	Number	Percentage	Number	Percentage	Number	Percentage
Graduation	821	30%	1478	54%	1642	60%
Continuation	921	33.6%	259	9.5%	119	4.3%
Attrition	996	36.4%	1001	36.6%	977	35.7%
Total	2,738	100%	2,738	100%	2,738	100%

For students who graduated from OSU, a rather large proportion graduated from colleges other than the one in which they had initially enrolled in Fall Term 2000. Table 2 lists the numbers of students who graduated from their original colleges and from other colleges transferred to by year. By the end of Summer Term of 2006, 60 percent of students (1,642) in the cohort class had graduated; 60 percent of them (984) graduated from the same colleges in which they originally enrolled in fall 2000 and 40.1 percent (658) graduated from other colleges. Students who stayed in the same college in which they had originally enrolled graduated sooner than others in the cohort who had changed colleges.

Table 2: Graduations in four, five, and six years						
Fall 2000 Cohort	2004		2005		2006	
	Number	Percentage	Number	Percentage	Number	Percentage
From same college	520	63.3%	912	61.7%	984	59.9%
From other colleges	301	36.7%	566	38.3%	658	40.1%
Total graduation	821	100.0%	1,478	100.0%	1,642	100.0%

In the group of continuing students, some continued in the same college, and some transferred to other colleges. Table 3 contains the number of net gain or loss of students by college in each year. The College of Engineering, College of Science, and the University Exploratory Studies Program consistently lost students to other colleges. The College of Forestry, Home Economics & Education, College of Liberal Arts and College of Health & Human Performance gained students from other colleges each year.

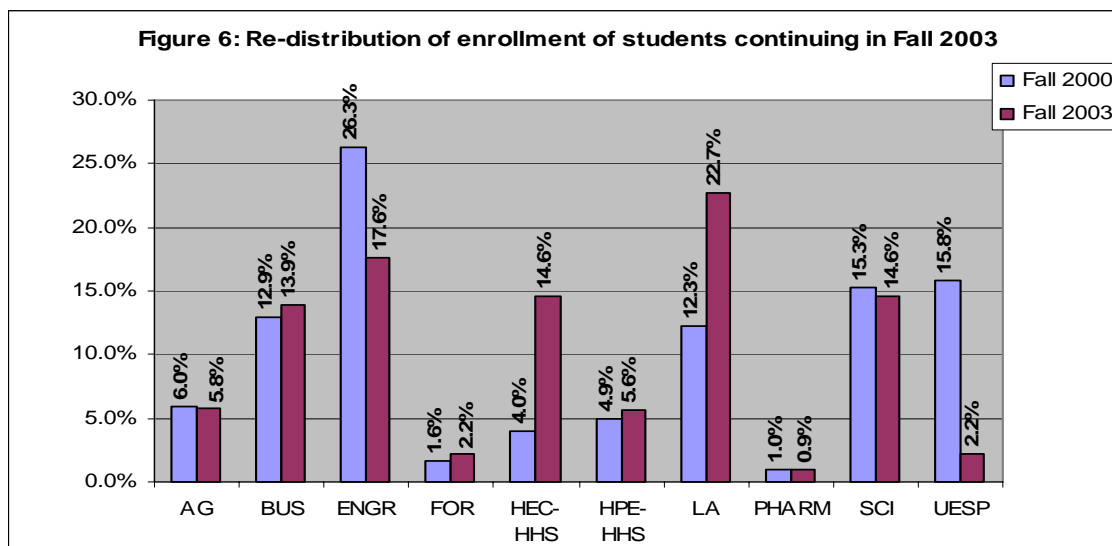

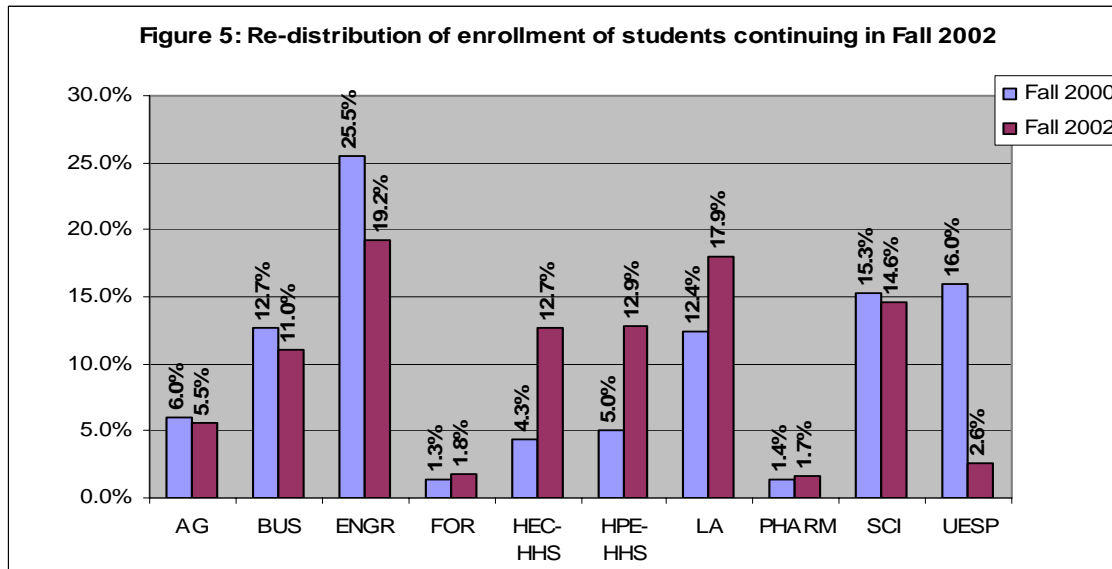

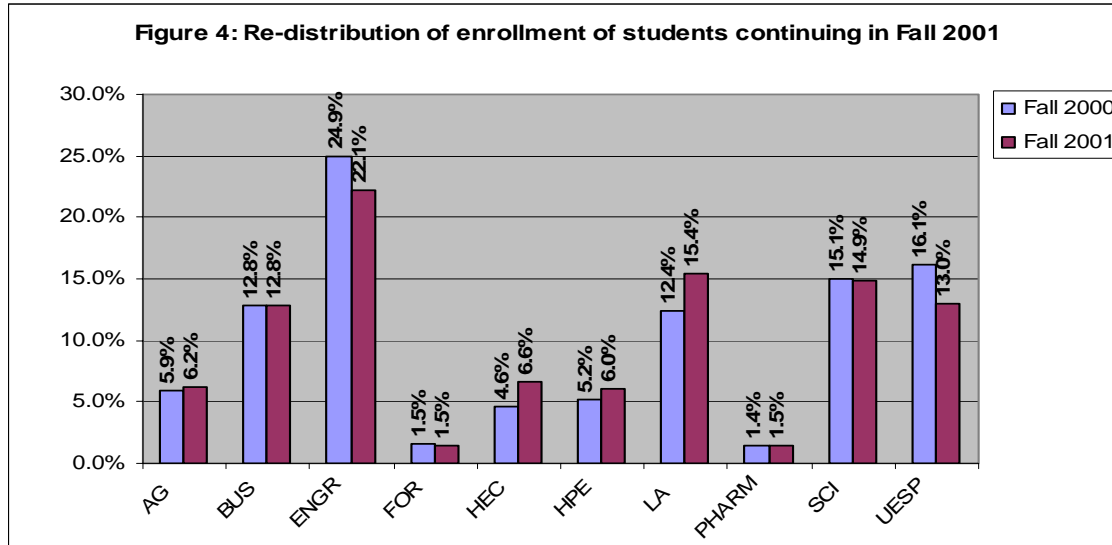

Table 3: Net gain/loss of students by college by each year

	2001	2002	2003	2004	2005	2006
Agricultural Sciences	6	-9	-3	0	0	1
Business	0	-32	18	35	2	3
Education	0	0	0	0	0	0
Engineering	-61	-121	-152	-111	-33	-18
Forestry	-1	9	10	5	3	1
Home Economics and Education*	42	162	187	90	16	9
Health & Human Performance*	18	151	12	84	23	-7
Liberal Arts	66	106	183	96	42	15
Pharmacy**	1	5	-2	-10	-5	12
Science	-4	-13	-12	-26	-8	-6
University Exploratory Studies Program	-67	-258	-241	-163	-40	-18

*The College of Home Economics and Education and Health & Human Performance were terminated in 2002. The College of Health and Human Sciences (HHS) and the College of Education were established in 2002. The numbers in 2002 - 2006 reflect the numbers gained by HHS.

**The Pharmacy numbers reflect the transition from a Pre-Pharmacy major housed in the College of Pharmacy to General Science major housed in the College of Science. The few students in the 2000 cohort mainly reflect this transition and are not reflection of the retention in the College of Pharmacy.

Details on the re-distribution of enrollment for continuing students are provided in Figures 4-9.

Tables 4-9.1 contain retention and graduation data for each college from Fall 2000 to Fall 2006 using the Fall 2000 cohort. The shaded columns in the first table on each page denoted the college that students migrated to by college. For example in Table 4, 30 Agricultural Sciences students left OSU after their first year. Of those who stayed at OSU, 120 continued in Agricultural Sciences, 2 transferred to Business, 1 to Health and Human Performance, 3 to Liberal Arts, 1 to Science, and 2 to UESP. Thus, Agricultural Sciences had 5.7% of their cohort migrate to other OSU colleges with 75.5% of the cohort remaining in Agricultural Sciences. The overall retention rate at OSU for this cohort of Agricultural Sciences students was 81.1%.

The second table on each page contains the net gain or loss by college for the freshman cohort. Again, for Agricultural Sciences, 2 were gained from Engineering, 3 were gained from Science, and 3 from UESP. Agricultural Sciences lost 1 student to Business and 2 to Liberal Arts. This was a total net gain of 6 students.

Over the course of this study, Liberal Arts consistently gained the most students from other colleges. Forestry, HEC, and HHP, also tended to consistently receive students from other colleges. UESP consistently transferred more students to other colleges; this was expected given the purpose of UESP. With UESP omitted, the Colleges of Science and Engineering tended to have the most students transfer to other OSU colleges over the course of the study.

The graduation results begin in Table 6, Fall 2000-Fall 2003. For example after three years Agricultural Sciences had 6 students from the Agricultural Sciences cohort graduate, making a three-year graduation rate of 3.8%. After four years (Table 7) those numbers increased to 70 students graduating for a 44.0% graduation rate; however, 12 of the students had graduated from another OSU college and 58 had graduated from Agricultural Sciences. For the fifth year (Table 8) graduation numbers for the Agricultural Sciences cohort, 97 students graduated; however, only 79 students were still in Agricultural Sciences. The other 18 students had graduated from other OSU colleges. The sixth year (Table 9) graduation rate for Agricultural Sciences was 64.8% with a total of 81 students from the Agricultural Sciences cohort graduating in Agricultural Sciences and 22 graduating from another OSU college.

Overall, the fourth year graduation data (Table 7) suggested that of those students in the cohort who graduated in four years about 37% were graduating from colleges other than the one in which they had originally enrolled. This number jumps to 38.3% after five years (Table 8) and to 40.1% after six years (Table 9).

About 40% of the students who graduated from OSU after six years had transferred to an OSU college that was different from the college in which they had initially enrolled. The implications of this information in terms of advising and helping students to transition from college to college seem particularly appropriate.

* Percentage of students transferred to other colleges from the college they originally enrolled in fall 2000.

** Percentage of students continued in the same college as they originally enrolled in.

***The Pharmacy numbers reflect the transition from a Pre-Pharmacy major housed in the College of Pharmacy to General Science major housed in the College of Science.

The few students in the 2000 cohort mainly reflect this transition and are not reflective of the retention in the College of Pharmacy.
