

Movement in Primary College

Fall Term 2013 Cohort Class

November 2019

Office of Institutional Research
300 Kerr Administration Building
Corvallis, Oregon 97331-8572

Many students change majors during the course of their college studies. Of course, “undeclared” students need to select a major at some point and thus will “change” their major. Students at Oregon State University are no exception, and indeed, the university is supportive of students exploring various options to determine the best major for their interests and career path. Even so, it is helpful for the university and colleges to track the rates of these major changes. This report provides statistics on major program changes for an entering fall freshman cohort.

We provide data on students that entered as part of a fall freshmen cohort. While transfer students and graduate students may also change majors, students starting as first-time freshmen are more likely to change majors. We use the same fall freshmen cohort that is the basis for standard retention and graduation rate reporting. This cohort represents students that are attending college for the first time as degree-seeking students and enrolled in the fall quarter (students that started the preceding summer are included) and were enrolled in 12 credits or more (full-time). The label “freshmen” is traditional but the cohort is not restricted to a certain class level. Sometimes the term “first-time college student from high school” is used, which is more accurate, albeit unwieldy.

Universities use retention and graduation rates to track the progress of students. The retention rate is a measure of continued enrollment and is usually from an entering quarter to an ensuing quarter. For example, the one-year retention rate is the percentage of new freshmen that entered in a given fall term and were enrolled the following fall term. The graduation rate is the percentage of a given fall cohort that have received their first bachelor’s degree by a certain point in time. The six year graduation rate measures the proportion that have graduated before the 7th fall quarter after their entering fall term. One should note that graduated students are not counted in retention rates after they have graduated, even if they continue to enroll.

This report provides data on the Fall 2013 freshman cohort, which consisted of 3553 students. The six-year graduation rate for this group was 67.1% and another 2.9% had not graduated but were still enrolled. We report the combination of those who have either

graduated or are still enrolled. Informally, some refer to this as “retention”, although we will not use that here, to avoid confusion with the retention rate.

Ideally, we would analyze individual major changes. But given the many majors available at OSU, students with multiple majors, and changes in program titles, department and college assignments, tables would require thousands of cells to account for all combinations. For convenience, we limit the analysis to changes in the college of the primary major listed in the student information system. Even here, we need to account for programs that move from one college to another.

Another simplification is to use the college where the first degree was earned as the “college graduated from”. This may be misleading when a student begins in one college, receives their first degree in another and later receives a degree in the original college. But accounting for this makes tables difficult to read.

Table 1 provides an overall university snapshot. For example, of the 188 freshmen that began with a major in the College of Agricultural Sciences in Fall 2013, six years later 95 received their first degree or were still enrolled with a primary major in Agricultural Sciences. Another 34 received a first degree or had a primary major under one of the other listed colleges. 59 did not receive an OSU degree and were not enrolled, at this point in time. Thus, 51% of entering Agricultural Sciences students graduated or were retained within the college six years later, while 69% of the same cohort graduated or were retained from OSU as a whole.

**Table 1: 2013 First-time, Full-time, Degree-seeking Entering Cohort: Primary College Movement
(Graduated or Still Enrolled at 6 Years)**

College at Entry	2013 Cohort	College Movement								No Graduation or Enrollment	% Grad or Enrolled	
		AG	BUS	EOAS	ENGR	FOR	LA	PHHS	SCI		College	OSU
Agricultural Sciences	188	95	5	0	1	2	9	8	9	59	51%	69%
Business	401	1	202	0	6	1	53	21	2	115	50%	71%
Earth, Ocean & Atmospheric Sciences	51	2	1	9	1	6	5	2	16	9	18%	82%
Engineering	1174	12	65	7	624	13	49	26	46	332	53%	72%
Forestry	37	1	1	0	0	17	2	1	0	15	46%	59%
Liberal Arts	336	5	11	1	3	1	172	23	8	112	51%	67%
Public Health and Human Sciences	364	5	13	0	4	3	23	190	2	124	52%	66%
Science	677	13	26	6	16	1	50	88	274	203	40%	70%
University Exploratory Studies Program	325	15	32	2	14	7	82	64	11	98	n/a	70%
Total	3553	149	356	25	669	51	445	423	368	1067	49%	70%

1. Based on college associated with primary major 1; does not account for multiple majors.

2. Graduation is based on college of primary major for first degree earned.

- About 30% of freshmen who graduated or were enrolled after 6 years had a different primary college from the one they started with (not counting UESP)

For those students who changed programs, the table reveals the typical patterns of movement from one college to another. For instance, Liberal Arts students frequently move to Public Health and Human Services, and vice versa. Science, which graduates or continues to enroll 40% of its students within the college had students migrate most frequently to Public Health and Human Services, followed by Liberal Arts and Business. Students who entered the university without a declared major (i.e., University Exploratory Studies Program) most frequently ended up in Liberal Arts, followed by Public Health and then Business.

Whereas the preceding table provided an overview of all colleges at the end of six years, what follows is a series of tables providing year-to-year data for each college. This allows for a look not only at which colleges students are moving to, but when those changes are typically made. For instance, most students who move to a different college appear to have done so by the end of two years.

COLLEGE OF AGRICULTURAL SCIENCES

2013 Cohort = 188

	1 Year	2 Year	3 Year	4 Year	5 Year	6 Year
Agricultural Sciences	132	110	101	90	94	95
